### SUMMARY

My diverse background that I can apply to frontend development makes me a versatile team player, open to any opportunity for continuous learning and innovation. I successfully overcome difficulties and never stop there.

### WORK EXPERIENCE

Frontend Developer, Aksoft Apr 2024- up to now

Frontend Developer , Jogorku Kenesh of the Kyrgyz Republic Jan 2024 - Apr 2024

- Developing the user interface for the electronic document management system using modern web technologies such as HTML, CSS, and JavaScript.
- Creating functionality for document upload, viewing, editing, and management, enabling users to interact with the system effectively and manage documents efficiently.
- Participated in conferences and meetings to enhance website usability and user experience, incorporating feedback from users to improve the system's features and usability.

Frontend Developer, Attractor School Oct 2023 - Jan 2024

Took part in the development of medium complexity social and commercial projects on the React framework. Utilized MongoDB as the database, and integrated other tools and solutions to optimize the development process and enhance project efficiency.

Project: "Destination KG"

- I worked with Strapi CMS, adding and editing product and promotion cards.
- Contributed to the creation of the header and burger menu. In the administrative part
- Integrated animations using Framer Motion on the 'About Us' page
- I worked on the development of a personal account with the ability to log in with Google
